The relationship between sleep and memory has been postulated and studied since at least the early 19th century. Memory, the cognitive process whereby experiences, learning and recognition are recalled, is a product of brain plasticity, the structural changes within synapses that create associations between stimuli.

In conventional usage, boredom is an emotional and occasionally psychological state experienced when an individual is left without anything in particular to do, is not interested in his or her surroundings, or feels that a day or period is dull or tedious.

Boredom - Wikipedia

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.

Carbohydrates, and the role they play in a healthy diet, are one of the most hotly contested nutritional debates in the world, both in conventional and ancestral health circles. On one side, youâ€™ve got folks who say that carbohydrates are nonessential and increase your risk for diseases such as diabetes, cancer, and neurological disorders.
